G. BENEDIKT Tradition since 1882

In 1882 the foundation stone of the porcelain factory had been laid in the town of Karlovy Vary. One of the currently largest porcelain factories in the Czech Republic focused mainly on the production of hotel porcelain.

As time went by, the porcelain factory found skillful colleagues in Austria and Switzerland. Therefore today, with Lilien Austria and Suisse Langenthal, we have created the "G. Benedikt Group".

What Makes G. Benedikt Hotel Porcelain different?

You can simply rely on the porcelain dishes made by G. Benedikt Group. It can impress not only with its design, but also with its characteristics that will withstand the extremely demanding gastronomy environment.

Highly durable porcelain

Against impacts, thermal shock and detergents. It can easily withstand the microwave oven and the automatic dishwashers.

The lasting beauty of all the patterns
There is no question of fading or scratching.
All of our patterns are without any exception under glazed.

Economical storage and transport
G.Benedikt collections are designed to make your operations as easy as possible.

Serial and custom production
Please contact us here at CJS if you are considering decorating your porcelain with a logo or a custom decoration.

ADVANTAGES OF HIGH-QUALITY PORCELAIN

Balanced construction guarantees porcelain 3x - 4x higher mechanical resistant

Thanks to in-glazed decoration all colours will remain equally saturated and expressive.

You can safely use porcelain in microwave ovens - as often as you want.

It is 100% sanitary safe. Meets the strictest hygiene standards

Special porcelain shaping saves space during storage and your nerves during transport.

Automatic dishwasher are no problem for our porcelain.

When something breaks, there is no need to panic. The items can be continuously supplemented and expanded.

From the freezer straight into the oven. No worries about thermal shocks with our porcelain.

The mint julep cocktail has always been traditionally served in the julep cup – again this would be made out of silver, again to show wealth but also to ensure the cup can be properly frosted for the best drinking experience. Our own julep cup is modelled on the original design with the single lip around the top, although ours are made out of a beautifully finished stainless steel rather than silver! This of course ensures good value for money with the Julep cups maintaining their quality and shine despite many a customer and many a wash.

RECIPE FOR MINT JULEP

- 6 cl Bourbon whiskey
- 4 mint leaves
- 1 teaspoon powdered sugar
- 2 teaspoons water

In a Julep Cup gently muddle the mint, sugar and water. Fill the glass with cracked ice, add Bourbon and stir well until the glass is well frosted. Garnish with a mint sprig.

Know Your COLOUR CODED CLEANING EQUIPMENT

The Purpose of Colour Coding is to ensure procedures are in place to prevent Cross-Contamination. This is achieved by segregating equipment in an easily identifiable manner, and by utilising visual references such as colour to prohibit Cross-Contamination. The colour coding system is applied by designating a particular colour scheme to cleaning products as well as food preparation products and processes.

RED

High risk areas
such as Toilets and
Washrooms floors

BLUE

General Low
risk areas where
there is less
risk of bacterial
contamination

GREEN

General Food
Preparation,
Catering
and Bar areas

YELLOW

Kitchen
and Food
Preparation
areas

TO SUCCESSFULLY UTILISE THE COLOUR CODE SYSTEM INTENDED TO PREVENT CROSS-CONTAMINATION

- Colour coding will have to be implemented in Induction training for new staff
- Continual training for staff already introduced to the procedures will need to be maintained
- Monitoring your colour coding system regularly to ensure it remains effective is essential
- Cleaning should be started in the least contaminated / cleanest areas to maintain a high level of efficiency, and the lowest level of contamination
- Colour coded Products include:
 - Knives • Chopping boards • Food Storage Containers • Food Serving Tongs • Aprons
 - Cloths • Mops • Mop Buckets • Brushes • Deck Scrubs • Squeegies • Gloves • Bins •

SYR INTERCHANGE SYSTEM

CLEANING EQUIPMENT

Interchange Compatible & Colour Coded

The SIR Interchange Handle can be swapped easily between all these tools on page 5 and 6. This means less items to carry as one handle does it all. SIR's Colour Coding of handles and tools enables the segregation of equipment to prevent cross contamination.

RED

High risk areas such as Toilets and Washrooms floors

BLUE

General Low risk areas where there is less risk of bacterial contamination

GREEN

General Food Preparation, Catering and Bar areas

YELLOW

Kitchen and Food Preparation areas

CUSTOMISE YOUR PORCELAIN

Brand recognition is more important than ever and here at CJS we want to help you get noticed, through the process of customising your crockery range.

Design isn't just restricted to your company's logo, it can incorporate colours and designs which may link in with many other features such as your establishment's décor, aspects or features of your Brand itself, helping to promote Brand recognition.

To decorate porcelain we use decals, spraying and hand painting, which allows us to create any

customisation on request. With almost unlimited colour combinations. All decors are in-glazed, which guarantees their lasting beauty allowing for everyday use.

Working with our partner G. Benedikt, having 130 years of experience in designing and creating bespoke crockery, we hope to bring your design wishes to reality. Creating a unique crockery concept for you which will give your business its own talking point and boost your Brand recognition. With an amazingly low MOQ of only 200pcs of mixed items.

WHAT WE REQUIRE FOR QUOTATION

- Picture of Logo / Design in PDF or AI Format.
- Your preferred placement within the piece.
- List of items & quantity per item.

LENGTH OF TIME TO PREPARE THE CROCKERY

- 2 weeks for preparation of physical sample.
- Upon sample approval 5weeks for production.
